* Sibelius. (Orange red with chocolate blotch)

SPECIES:

Arborescens 12.50
Calendulaceum 12.50
* Ghent Hybrids 15.00
* Knaphills 17.50

SPECIES: (cont.)

Kaempheri Hybrids (from seeds). These are especially good and the range of color is excellent.	12.50
* Mollis hybrids	12.50
Poukhanensis	12.50
* Schlippenbachi	12.50

October and November Planting

Planting in the fall has some decided advantages. You have time now to plan your selections, decide where you want to plant, get the ground ready, and do the planting. When spring comes then, you don't have to worry about such matters, but you can concentrade upon sales. 'Helps a lot.

However, fall planting is not entirely without its risks. In fact, some things such as Azaleas, Boxwoods, Blue Hydrangeas, etc. might be best planted in the spring. Hard freezes when there is no snow protection can cause some losses to these items. On the other hand, if planted under shade and with rodent protection, the plants should be safe. Many items marked with an asterisk (*) are so marked to discourage fall planting.

COME AND GET YOUR SELECTIONS NOW, OR PLACE YOUR ORDER FOR SPRING.
